

Time Series Database Interface: TSpadi Extensions

August 14, 2012

1 Introduction

TSpadi has been largely replaced by other TS* packages and is not longer extensively tested.

The package *TSpadi* provides methods for generics in the package *TSdbi*. A complete vignette, illustrating the general functionality of all *TSdbi* extension packages is provided in the vignette with package *TSdata*. Installing that package requires that most of the TS* packages are available, which will not be necessary for most users, so it may be easier to get the pdf version of the vignette from CRAN at <http://cran.r-project.org/web/packages/TSdata/index.html>.
